1 Result

1.1 Formula

This is the key equation for our analysis:

$$E = mc^2 \tag{1}$$

Equation (1) shows the famous mass-energy equivalence.

1.2 Data Table

Table 1 summarizes the configuration settings.

Mode	Latency (ms)
normal	120
safe	180

Table 1: Configuration settings and their latency

As shown in Table 1, different modes have different latency values.
